

Stripping bathtub system

Benefits

The internal sheathing of the bathtubs is made of stainless steel

Fully automatic operation

Stainless steel lid, automatic opening

Two drip zones, two baskets

Bathtub with a water jacket, indirectly heated

Can be extended with a filtration system

Solid welded construction

Insulated housing, made of easily removable panels

Evaporation minimization - cover always present

Adjustable heating temperature and hysteresis

The work calendar allows you to keep the bathtub always ready for work

Dedicated lifting system on the straps - resistant to harmful conditions, prepared for heavy loads
