

Suspended chain conveyors

ROMER company also produces the head-up transport systems.

Transport systems are designed and manufactured according to the customer's request.

Below some of accessories used for transport system.

Suspended chain transport systems - continuous, designed and manufactured to individual customer orders.

In this system, you can also make bottom conveyor systems on which details are placed, e.g. flower pots, rims (photo above).

Below is an example of a system made in this technology.
