

# Reverse osmosis station

## Reverse osmosis station equipment

- Measurement of the conductivity of treated water
- Low pressure diaphragm
- Stainless steel diaphragm housing
- Stainless steel frame
- Multistage centrifugal pump
- 5 mm absolute filter
- Permeate and concentrate flow meter
- The control cabinet
- Automatic inlet valve
- Automatic membrane washing system
- High pressure gauge
- Low pressure switch
- High pressure switch

	<b>RO1-20</b>	<b>RO1-40</b>
Permeate flow	200L / h	400L / h
Engine power	0.55kW	0.75kW
Salt water flow	400L / h	800L / h
Feed water connection	1/2 "	1 "
Permeate and concentrate connection	1/2 "	1/2 "
Ambient temperature	0-45 ° C	
Connection
