Save powder with a flick of your hand!

Save time and money!

Saving powder

The integrated 100 kV cascade duplicator provides
maximum charging capacity. This means that more paint reaches
detail, less to the paint recovery system! digital valve control technology ensures accurate metering
and repeatable amount of powder. This allows for a more uniform
coatings.

ProfiGun PM-1D pistol

- Light ergonomic pistol, perfectly balanced with a contoured handle
- Ceramic cascade with voltage up to 100,000V efficiently charges all types of powders
- **The**new generation of nozzles ensures perfect powder penetration into complex shapes
- **The**profiled nut allows a good grip
- High-carbon conductive handle provides excellent painter grounding
- The gun is made of special materials with increased impact resistance
- Fully demountable design with replaceable powder path tube
- The gun is patented in the US and EU
- Cascade polarity - negative

PoProfiJector powder coating mpa

- Construction of a new efficient injector
- Most effective feed angle demonstrated by testing
- Saves paint and air compared to injectors with right angles
- Compared to other pumps, it has relatively low operating costs
- injector is subject to a European patent

APC-01 controller

- 3 predefined programs, 17 own programs
- Electronic pressure sensors, manual regulators
- Repainting, Painting area hard to reach, Mal. over Flat
- Integral-derivative current system stabilizing the voltage
- Selection of current parameters depending on the distance from the painted detail
- Bright LED display
